Address: Gori Turn 5, 0112, Tbilisi, Georgia (Home)

ABOUT ME

- Full-stack Developer dedicated to front-end
- 6+ years of professional experience in the Information Technology industry;
- Experienced in front-end development (JavaScript, front-end frameworks React.js, Next.js, Vue.js and third-party sources, HTML5, CSS3);
- Experience in back-end development (Node.js, Express.js);
- Experience with server-side JavaScript (Node.js);
- Experience with JavaScript-related languages (TypeScript);
- Experience with SQL Databases (Postgres)
- Experience with microservices and REST principles;
- Experience with styling frameworks (TailwindCSS, styled-components, Material-UI);
- Experience with BEM Methodology
- Solid understanding of object-oriented and functional programming design concepts and patterns;
- Understanding of design approach, ability to create good UI from scratch;
- Ability to transform designs into code;
- Good understanding of SEO principles;
- Experience working in large distributed teams.

WORK EXPERIENCE

12/11/2022 – CURRENT

SENIOR SOFTWARE DEVELOPER DATAART SOLUTIONS, INC.

Projects:

Train operating company

The project aimed to develop an application for managing train tickets. The UI part was created with React. The styles were created using styled components and SCSS. The back-end was built on .NET and Node.js.

I was responsible for:

- Optimizing web pages for maximum speed and scalability;
- Creating UI Components;
- Creating portalization for different portals;
- Ensuring website is optimized for smartphones;
- Creating custom server side renderer using express.js
- Working with RESTful API;
- Working on Microservices
- Investigating the old part of the code for refactoring purposes

01/12/2021 – 16/01/2023 Toronto, Canada

SENIOR SOFTWARE DEVELOPER FH HEALTH

Projects:

Software for distance treatment

The project aimed to provide tool for distance treatment, to give patients doctor's prescriptions and appointments online. UI Part was created using React js (Material UI as a styling framework). Back-end was built using Django and Nest js

I was responsible for:

- Optimizing web pages for maximum speed and scalability;
- Was Responsible to built React components using Material-UI
- Ensuring website is optimized for smartphones;
- Implementing auth0;
- Was part of multiple architectural meetings;
- Mentorship and code review for junior colleagues.
- Working with Firebase and RESTful API;

12/08/2018 – 01/01/2022 Tbilisi, Georgia

SOFTWARE DEVELOPER LEAVINGSTONE - DIGITAL AGENCY

Projects:**Georgian farmers online store**

The project aimed to develop a solution for farmers to make their products available to people from different regions. The UI part was created with React.js and Next.js for static generation and server side rendering using modern technologies and approaches, including code splitting, lazy loading and optimizing of significant amounts of high-quality images. Redux was used for state management. The styles were created using SCSS and TailwindCSS. CMS was created using Vue3 with vuexify template. The back-end was built on .NET (REST API).

I was responsible for:

- Creating front-end application and components from scratch;
- Optimizing web pages for maximum speed and scalability;
- SEO Optimization;
- Ensuring website is optimized for smartphones;
- Optimizing images using, using webp format when possible;
- Full implementation of the client-side checkout (payment) page.
- Implementing Facebook and Google authorization;
- Mentorship and code review for junior colleagues.
- Working with RESTful API;

Governmental Website

The project aimed to rewrite old governmental website into new one using modern technologies. The UI part was created with React and Next.js for server side rendering and SEO optimization. The styles were created using SCSS and TailwindCSS. The back-end was built on .NET.

I was responsible for:

- Creating website from scratch;
- Creating new application components;
- Creating storybook for application components;
- Optimizing web pages for maximum speed and scalability
- Images optimization and lazy loading;
- SEO Optimization
- Ensuring website is optimized for smartphones;
- Mentorship and code review for junior colleagues.
- Working with RESTful API;

Creative and Digital Agency

Developed a website for digital agency with full of animations. Project aimed to win awwwards.com award. The UI part was created using Next.js static site generation as it gives maximum speed, so animations were smooth. Admin panel was built using React.js with Material UI. Back-end was built on .NET. Animations was created using GSAP library. The website itself was also optimized for SEO.

I was responsible for:

- Building website from scratch;
- Transforming design into HTML, CSS;
- Creating beautiful and smooth animations using GSAP;
- Creating back-end application using .NET framework;
- Providing RESTful services;
- Creating Admin panel for content management;
- Implementing horizontal scroll;

Georgian second hand clothes online store

The project aimed to develop a solution for the management of goods. The UI part was created with React and Next.js. The styles were created using SCSS and TailwindCSS. The back-end was built on .NET.

I was responsible for:

- Optimizing web pages for maximum speed and scalability;
- SEO Optimization;
- Ensuring website is optimized for smartphones;
- Full implementation of the client-side checkout (payment) page.
- Implementing Facebook authorization;
- Working with RESTful API;
